ABOUT ME

Enthusiastic Computer Science student with a decent programming base. Seeking an internship opportunity to apply my skills, learn from professionals, and add value to the team.

PROJECTS

AI Based Mood Detection and Song Recommendation -- Python , ML

- Developed a voice-based emotion detection system using LSTM Model.
- Trained the model on the TESS (Toronto Emotional Speech Set) dataset.
- Extracted audio features such as MFCC, pitch, and energy using Librosa.
- Classified emotions like happy, sad, angry, fearful, and neutral.
- Built a song recommendation module that suggests songs based on detected mood.
- Implemented an end-to-end pipeline from voice input to music recommendation.

Disease Prediction Model ---- [GIT HUB](#) July 2025

Video Summary Generator ---- (Ongoing Project)

EDUCATION

Jaypee University of Engineering and Technology

Bachelor of Technology in Computer Science, CGPA: 7.56/10.0

Guna , (M.P)

July 2023 - Ongoing

O.P Jindal School

Class XII Percentage: 76.8/100

Raigarh , (C.G)

May 2023

Sanskar Public School

Class X Percentage: 74/100

Raigarh , (C.G)

May 2021

SKILLS

- **Languages** : C , C++ , Python , Java , OOPs , MySql , HTML/CSS , JavaScript
- **Frameworks/Libraries** : Pandas , Numpy , Sci-kit Learn , Librosa , React

WORK EXPERIENCE

Machine Learning Internship – CodeAlpha

- Built classification models for healthcare and financial datasets.
- Performed data preprocessing, feature selection, model training, and evaluation using Python and ML libraries
- Improved model accuracy through hyperparameter tuning and performance evaluation (Accuracy, Precision, Recall).
